

Water pressure system

Choose the right product for your pressure system.

Most Methven products are suitable for all pressure installations (above 35kPa). However, not all products sold in New Zealand are capable of handling all pressures, so always check the technical details.

To determine the individual pressure system, please refer to the hot water cylinder. Alternatively, use this handy chart:

ALL PRESSURE INSTALLATIONS
(Mains, Unequal and Equal Low Pressure)
For all pressure installations (above 35kPa).
Look for Methven products with this icon.

MAINS PRESSURE INSTALLATIONS
For mains pressure installations only (above 150kPa).
Look for Methven products with this icon.

EQUAL LOW INSTALLATIONS
For equal low pressure installations only (120kPa and below). Look for Methven products with this icon.
